Boat particulars & machinery

Builder / model	Bavaria / 38 Cruiser
Registration	H-28676
Year built	2008
Registered length	11.45 m
Beam / draft	3.90 m / 1.55 m
Registered displacement	7.3 t
Engine	Volvo Penta D1-30B diesel
Transmission	Saildrive 130S (original warranty card)
Last haul-out	29 April 2026 (approved sales listing)

Reading the specifications

The registration gives 11.45 m as the boat's length and 7.3 t as displacement. The approved listing also gives 11.72 m overall, 9.90 m waterline length and 7,000 kg light displacement; these are different measurement definitions from the model documentation, not independently verified measurements of this boat.

Engine output differs across the records (20.1, 20.9 and 21 kW); a confirmed power figure is therefore withheld. Engine hours and recent service details remain to be confirmed. The original warranty card reads 130S, correcting "1305" in the listing.

Certification & identification

Factory paperwork includes design category A documentation. This is distinct from the boat's operating registration, which records D / sheltered waters. No unrestricted ocean-use claim is made. The hull identifier differs by one character across original records and is withheld pending an identification-plate check.

The listing's mast height, transport height, maximum laden displacement, sail areas, reduction ratio and propeller specification are not presented as confirmed particulars until checked against this boat.

Life aboard & equipment

Interior & deck

Three cabins, saloon and one head; chart table, lockers and saloon table. The galley includes a gas cooker with oven, sink and refrigerator. The approved listing records pressurised hot/cold water, a QL water heater, Jabsco pump equipment and an electric bilge pump.

Listed deck equipment includes a Side-Power bow thruster, folding Lewmar steering wheel, electrically operated bathing platform, teak cockpit sole, electric anchor windlass, helm seating and cockpit shower. Final inventory and operation should be checked at viewing.

Navigation & electrics

The boat's document pack includes Raymarine SmartPilot X-5 with ST6002, ST60+ Tridata and ST60 wind-instrument manuals. Navman branding and a compass are visible at the helm. The precise Navman chartplotter and GPS models remain unconfirmed because the listing and multi-model manuals differ.

Shore power and a Quick SBC Advanced Plus charger are described in the approved listing. The switch panel is visible in the photographs. JVC Bluetooth audio and external speakers are also listed; the exact player variant remains unconfirmed.

Further details & enquiries

Capacities requiring confirmation

Fresh water	Approx. 210 l — listed, not independently verified
Diesel	Approx. 150 l — listed, not independently verified
Wastewater	Approx. 80 l — listed, not independently verified
Starter battery	12 V / 55 Ah — current installation unconfirmed
House batteries	2 × 12 V / 135 Ah — number and capacity unconfirmed

These capacities appear in the approved sales listing but also in model documentation containing options. They require a current onboard check. The optional 3 kg gas bottle and specific sail configurations are not confirmed as included.

Safety & maintenance

The approved listing names life jackets, a life ring, fog horn, emergency signal kit, first-aid kit and fire extinguisher. Quantities, expiry dates and serviceability are to be checked. No liferaft, EPIRB, VHF, AIS or radar is represented as included without confirmation.

The documented 2010 handover and original engine warranty are available in the boat's records. A repair quotation or work-order form is not treated as proof that work was completed. A complete recent service history remains to be confirmed.

The berth & the sale

Asking price: 30,000,000 HUF including the BL Yacht Club K27 berth lease right, subject to marina approval. The berth agreement reviewed runs from 1 April 2026 to 31 March 2027. Any transfer, subsequent term and applicable services must be agreed with the marina.
